

CENTER FOR
SUSTAINABLE ENERGY
KANSAS STATE UNIVERSITY

Kansas State University
Center for Sustainable Energy presents –

The 2015 Energy Symposium

The North American Energy Perspective

April 8 – 9, 2015

The symposium focuses on the future of North American energy production and sustainable alternatives to current trends. Experts in fields relating to policy, engineering, economics, sociology, and agronomy will discuss their perspectives on the current outlook for North American energy.

Presentations will feature national experts, as well as opportunities for networking and research discussions. Free registration for the symposium is now open for faculty, students, staff and the general public at <http://cse.ksu.edu>. A poster session will be open to all K-State undergraduate and graduate students who are conducting research related to energy, with prizes awarded for the top posters (\$750 for 1st place, \$500 for 2nd place and \$350 for 3rd place).

More details are available on the K-State Center for Sustainable Energy website at <http://cse.ksu.edu>

For further information, please contact Michael Heidlage, symposium chair, at mheidlage@ksu.edu or Keith Rutlin at rutlin@ksu.edu
